

Ascio's Privacy/Proxy Service

Ensure anonymity for you and your customers

Privacy/ Proxy

With Ascios privacy and proxy services you can ensure ICANN compliant anonymity for you and your customer in the Whois.

Keep your information confidential...

When you register or update a domain, the registrant contact details becomes publically available on a database known as the Whois. Acting like a telephone directory, it allows others to track down the owner of a domain if they need to. With contact data so readily available, it opens up the domain owner to potential identity theft, domain hijacks, and other illegal activities. However, you and your customers need not worry. With Ascio's Privacy/Proxy service you can:

- Keep domain owner identity confidential in the Whois directory.
- Provide protection against identity thieves, stalkers, and harassers.
- Prohibit domain hijackers
- Offer a service that is fully ratified and compliant with ICANN

Ascio Proxy Services

Our Proxy service ensures that the identity of a domain owner remains completely hidden from appearing in the Whois. The proxy becomes the registered name holder on record replacing that of the domain owner. Owners will still have full access to manage their domain but without their name appearing in the Whois.

Features:

- We mask ALL of the contact data
- The proxy will be the entity listed as the registrant in the Whois
- Available for all ICANN governed TLD's (gTLDs and New-gTlds)
- Automated generation of unique mail address per masked contact, with received mails forwarded to the real contact.
- Proxy solution is compliant with registrant verification, ERRP, Whois-data reminders, and ICANN escrowing requirements.

Ascio Privacy Services

Our Privacy Service allows a domain name holder to be listed as the official owner but with alternate, valid contact data (such as a mail-forwarding service address) published in place of the registrant's contact details. In other words, if you register a domain, your name would appear but your "real" contact details would be replaced by a new unique alternate address.

Features:

- Default masking of Registrant and Admin-C contact data (excl. registrant real name)
- Flexible masking options. Choose what you want to mask, be it all or select contact details.
- Available for all ICANN governed TLD's (gTLDs and New gTlds)
- Automated generation of unique mail address per masked contact, with received mails forwarded to the real contact.
- Privacy solution is compliant with registrant verification, ERRP, Whois-data reminders, and ICANN escrowing requirements.

Existing Partner? Interested to know more? Here is some further info...

- Privacy Proxy services can be managed through Ascio's Web Service (AWS) and partner portal
- It is possible to add Privacy / Proxy when registering or transferring in a domain
- You can add or remove Privacy / Proxy for existing domains at any time with a proper command
- We allow you to update all real social data for a domain and still keep P/P active
- P/P must be removed from domain name prior to a transfer away
- We offer reporting for domains. with P/P, in their portfolio through our Portal and AWS

Public Whois Example

Still not sure on how Privacy/Proxy works? Then our example below should help you.

Whois with Privacy Service

Whois with Proxy Service

Always masked, but with the real owner name displayed

Registrant

About Ascio

Ascio is a leading expert in domain name management, and offers the full scope of domain names to its clients; be it gTLDs, new gTLDs, or ccTLDs. Founded in 1999 and ICANN accredited ever since, Ascio currently has more than two million domains under management and employs over 350 people in offices throughout the world. Ascio is responsible for the provision of Domain Portfolio Management services to more than 450 partners. These primarily include telecommunication and web hosting companies, internet service providers, and intellectual property law firms.

Ascio is a separate division of Netnames Group Ltd., one of the world's largest corporate brand protection specialists
